

# SUSE Manager 3 - SMT Synchronization

# Agenda

- Scenario
- Data Export > Import
- Configuration
- Add and Sync Channels
- Verify Synchronization

# Scenario

If it is not possible to connect SUSE Manager directly or via a proxy to the Internet, a disconnected setup in combination with Subscription Management Tool (SMT) is the recommended solution.

# **Data Export > Import**

- Export data
- Import data

# Configuration

- Specify the local path on the SUSE Manager server in `/etc/rhn/rhn.conf`

# Add and Sync Channels

- Channels are RPM repositories like:
  - `sles12-sp1-pool-x86_64`
  - `sles12-sp1-updates-x86_64`
  - `sle-ha12-sp1-pool-x86_64`
  - `sle-ha12-sp1-updates-x86_64`
  - `sle-module-containers12-pool-x86_64-sp1`
  - `sle-module-containers12-updates-x86_64-sp1`

# Verify Synchronization

- Log files
- WebUI
- spacecmd
